Cyber security issues: Example. Why do we need to change it?

The screenshot shows a web browser window with two tabs: 'Guide' and 'CPT202-2425-S2: All Aliyu Serve'. The address bar shows the URL `core.xjtlu.edu.cn/mod/forum/discuss.php?d=20057`. The page header includes the 'LEARNING MALL CORE' logo and navigation links: 'Dashboard', 'My courses', 'All modules', and 'Need Help?'. On the right, there are search, notification, and user profile icons, along with an 'Edit mode' toggle.

The main content area displays a forum post titled 'All Aliyu Servers are available' by user 'Chengtao Ji' on Friday, 28 March 2025, at 19:24. The post is set to 'Display replies in nested form'. The content of the post is as follows:

Dear Students,

All Aliyun servers available and account information are sent to you.

Please be noted that:

- 1, GROUP LEADER please **change your password** as soon as possible once you receive the server.
- 2, The **default** operating system is **Ubuntu**. If want to use Windows instead of Ubuntu, please let me know.
- 3, Please try to deploy your application if it is ready, figure the bug out whenever you encounter and try fix it. Try to deploy the application during the development rather than at the end. Otherwise, you will face lots of problems.
- 4, Not all ports are open due to the security reason. If you need specific ports, please let me know.

Here are some videos for your reference (Optional):

- 1, If you are using CodeWithMe plugin of JetBrains, you can follow the video to deploy your application:

Thank you for your attention !

In this lecture, you have learned:

- Legal issues
- Social issues
- More information on the learning mall
