

Fictitious Project

Epics and Features for E-Commerce Platform

Epic 1: User Account Management

- **Feature 1.1:** User Registration and Login
- **Feature 1.2:** Profile Management
- **Feature 1.3:** Password Recovery and Security

Epic 2: Product Catalog

- **Feature 2.1:** Product Listing and Search
- **Feature 2.2:** Product Details Page
- **Feature 2.3:** Category and Filter Management

Epic 3: Shopping Cart and Checkout

- **Feature 3.1:** Add to Cart Functionality
- **Feature 3.2:** Cart Management (update, remove items)
- **Feature 3.3:** Checkout Process
- **Feature 3.4:** Payment Gateway Integration

Epic 4: Order Management

- **Feature 4.1:** Order History and Tracking
- **Feature 4.2:** Order Cancellation and Returns
- **Feature 4.3:** Invoice Generation

Epic 5: Customer Support

- **Feature 5.1:** Live Chat Support
- **Feature 5.2:** FAQ and Knowledge Base
- **Feature 5.3:** Ticketing System for Issues

Epic 6: Marketing and Promotions

- **Feature 6.1:** Discount and Coupon Management
- **Feature 6.2:** Email Marketing Campaigns
- **Feature 6.3:** Product Recommendations and Upselling

Epic 7: Analytics and Reporting

- **Feature 7.1:** Sales and Revenue Reports

- **Feature 7.2:** Customer Behavior Analytics
- **Feature 7.3:** Inventory and Stock Reports

To-Do List Project

Project Specification: To-Do List Web Application

Project Overview

The To-Do List Web Application is designed to help users manage their tasks efficiently. The application will allow users to create, view, update, and delete tasks. It will be a responsive web application accessible from both desktop and mobile devices.

Key Features

User Registration and Authentication

- Users can create an account using an email address and password.
- Implement secure login and logout functionality.
- Password recovery option via email.

Task Management

- **Create Task:** Users can add new tasks with a title and optional description.
- **View Tasks:** Display a list of tasks with the ability to filter by status (e.g., all, active, completed).
- **Update Task:** Users can edit task details, including title, description, and status.
- **Delete Task:** Users can remove tasks from their list.

Task Organization

- **Categories/Tags:** Allow users to categorize tasks using tags.
- **Due Dates:** Option to set and modify due dates for tasks.
- **Priority Levels:** Assign priority levels (e.g., low, medium, high) to tasks.

User Interface

- Responsive design to ensure usability on various devices (desktop, tablet, mobile).
- Intuitive and user-friendly interface with clear navigation.

Notifications

- Optional email or in-app notifications for upcoming due dates or overdue tasks.

Technical Specifications

Frontend:

- HTML, CSS, JavaScript
- Framework: React.js or Vue.js

Backend:

- Language: Node.js
- Framework: Express.js
- Database: MongoDB or PostgreSQL

Authentication:

- JWT (JSON Web Tokens) for session management.

Features and PBIs for To-Do List Project

- **Feature 1.0:** As a user, I want to manage my account securely so that I can protect my personal information.
 - **PBI 1.1:** As a new user, I want to register with my email and password so that I can create an account and access the application.
 - **PBI 1.2:** As a registered user, I want to log in and log out securely so that I can access my tasks safely.
 - **PBI 1.3:** As a user who forgot my password, I want to recover it via email so that I can regain access to my account.
- **Feature 2.0:** As a user, I want to manage my tasks effectively so that I can keep track of my responsibilities.
 - **PBI 2.1:** As a user, I want to create a new task with a title and description so that I can keep track of what I need to do.
 - **PBI 2.2:** As a user, I want to view a list of my tasks with filtering options so that I can easily manage them.
 - **PBI 2.3:** As a user, I want to edit my tasks so that I can update their details as needed.
 - **PBI 2.4:** As a user, I want to delete tasks so that I can remove tasks I no longer need.
- **Feature 3.0:** As a user, I want to organize my tasks efficiently so that I can prioritize and categorize them.
 - **PBI 3.1:** As a user, I want to add categories or tags to my tasks so that I can organize them better.
 - **PBI 3.2:** As a user, I want to set due dates for my tasks so that I can prioritize my work.
 - **PBI 3.3:** As a user, I want to assign priority levels to tasks so that I can focus on what's most important.
- **Feature 5.0:** As a user, I want to receive timely notifications so that I can stay informed about my task deadlines.

- **PBI 5.1:** As a user, I want to receive email notifications for upcoming tasks so that I don't miss deadlines.
- **PBI 5.2:** As a user, I want in-app notifications for overdue tasks so that I can address them promptly.

A Large PBI 2.2 for To-Do List Project

PBI 2.2: View a List of Tasks with Filtering Options

User Story: As a user, I want to view a list of my tasks with filtering options so that I can easily manage and prioritize them.

Acceptance Criteria:

1. **Default Task List Display:**
 - **Given** the user is logged in and navigates to the task page,
 - **When** the page loads,
 - **Then** all tasks should be displayed by default in chronological order with the most recent tasks at the top.
2. **Filtering by All Tasks:**
 - **Given** the user is on the task list page,
 - **When** the user selects the "All" filter option,
 - **Then** all tasks, regardless of status, should be displayed.
3. **Filtering by Active Tasks:**
 - **Given** the user is on the task list page,
 - **When** the user selects the "Active" filter option,
 - **Then** only tasks that are not marked as completed should be displayed.
4. **Filtering by Completed Tasks:**
 - **Given** the user is on the task list page,
 - **When** the user selects the "Completed" filter option,
 - **Then** only tasks that are marked as completed should be displayed.
5. **Filter Persistence:**
 - **Given** the user has selected a filter option,
 - **When** the user navigates away from and then returns to the task list page,
 - **Then** the previously selected filter option should still be applied.
6. **Task Display Format:**

- **Given** tasks are displayed in the list,
- **When** a task is listed,
- **Then** it should display the title, truncated description, due date (if set), priority level (if set), and status indicator.

7. **Responsive Design:**

- **Given** the user accesses the task list on different devices,
- **When** the screen size changes,
- **Then** the layout should adjust without losing functionality.

8. **Performance:**

- **Given** there are up to 100 tasks,
- **When** the task list loads or a filter is applied,
- **Then** the list should update within 2 seconds.

9. **Accessibility:**

- **Given** the user is navigating with a keyboard,
- **When** the user accesses filtering options,
- **Then** all options should be selectable via keyboard, and screen readers should announce the number of tasks and current filter.

10. **Error Handling:**

- **Given** there is an error loading tasks,
- **When** the page attempts to load tasks,
- **Then** an error message should be displayed with an option to retry.

11. **No Tasks Scenario:**

- **Given** the selected filter results in no tasks,
- **When** the task list is displayed,
- **Then** a message indicating no tasks are found should be shown, with a link or button to create a new task.

PBI2.2 Split into PBI2.2A and PBI2.2B

PBI 2.2a: View a List of Tasks

User Story: As a user, I want to view a list of my tasks so that I can see what I need to work on.

Acceptance Criteria:

1. **Default Task List Display:**
 - **Given** the user is logged in and navigates to the task page,
 - **When** the page loads,
 - **Then** all tasks should be displayed by default in chronological order with the most recent tasks at the top.
2. **Task Display Format:**
 - **Given** tasks are displayed in the list,
 - **When** a task is listed,
 - **Then** it should display the title, truncated description, due date (if set), priority level (if set), and status indicator.
3. **Responsive Design:**
 - **Given** the user accesses the task list on different devices,
 - **When** the screen size changes,
 - **Then** the layout should adjust without losing functionality.
4. **Performance:**
 - **Given** there are up to 100 tasks,
 - **When** the task list loads,
 - **Then** the list should update within 2 seconds.
5. **Error Handling:**
 - **Given** there is an error loading tasks,
 - **When** the page attempts to load tasks,
 - **Then** an error message should be displayed with an option to retry.
6. **No Tasks Scenario:**
 - **Given** there are no tasks to display,
 - **When** the task list is displayed,

- **Then** a message indicating no tasks are found should be shown, with a link or button to create a new task.

PBI 2.2b: View a List of Tasks with Filtering Options

User Story: As a user, I want to filter my list of tasks by status so that I can focus on specific tasks.

Acceptance Criteria:

1. **Filtering by All Tasks:**

- **Given** the user is on the task list page,
- **When** the user selects the “All” filter option,
- **Then** all tasks, regardless of status, should be displayed.

2. **Filtering by Active Tasks:**

- **Given** the user is on the task list page,
- **When** the user selects the “Active” filter option,
- **Then** only tasks that are not marked as completed should be displayed.

3. **Filtering by Completed Tasks:**

- **Given** the user is on the task list page,
- **When** the user selects the “Completed” filter option,
- **Then** only tasks that are marked as completed should be displayed.

4. **Filter Persistence:**

- **Given** the user has selected a filter option,
- **When** the user navigates away from and then returns to the task list page,
- **Then** the previously selected filter option should still be applied.

5. **Accessibility:**

- **Given** the user is navigating with a keyboard,
- **When** the user accesses filtering options,
- **Then** all options should be selectable via keyboard, and screen readers should announce the number of tasks and current filter.
